ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.*

(54) Title: COATED STENT

(57) Abstract: The invention relates to an improved construction of a coated surgical stent with a compound containing a high density, negatively charged domain of at least three vicinally oriented phosphorous-containing radicals, such device being defined as an object used for example to hold open blood vessels dilated by angioplasty, particularly coronary blood vessels, iliac aetrias and the alike and which device are utilized to widen blood vessels or other orifices in the body and which compound is preventing restenosis.
